

TXT70~TXT80 (Rookie Trial)

Transmission lubricant.

Oil capacity of transmission is 650cc 5W30 non-synthetic motor oil. This motorcycle uses a “dipstick type” oil filler cap. Check oil level of the transmission with dipstick resting in hole in un-screwed position.

Chassis capacities and specifications.

NOTE: Capacities and specifications for chassis components are the same as the full size GasGas trial bikes.

Carburetor set-up options. (Hints)

1. Needle in full rich position. (needle clip in bottom slot position)
2. Cut angle on SLIDE within 2mm of the bottom deck. (See diagram below for more information.)
